Maxence Poutord

Software Engineer

I'm Maxence, a French Software Engineer with 10 years of experience developing web-based applications. I am a dedicated, hardworking, ambitious person that gets things done, both on my own initiative and within a team. I enjoy challenges and I am not afraid of getting my hands dirty. Because knowledge sharing matters to me, I spend a non-negligible part of my time sharing things through blog posts, mentoring sessions or conferences.

Skills

Proficient
JavaScript
Vue.js
Git
Testing (Jest&Testing library)

Comfortable
React.js
Gatsby.js
CI/CD
Web Accessibility (A11Y)
Web Performances
Functional Programming

Familiar
Node.js
Docker
Firebase
GraphQL

Languages

Advanced
English

Native
French

Intermediate
Spanish

Interests

Canyoning (I guide group), hiking, cinema (especially Danish), cooking, travelling, video games (Age of Empire II) and personal development.

Highlights

- Write technical blog posts in French & English (see maxpou.fr)
- Mentor junior developers and people who want to retrain as a developer
- Tech trainer and public speaker (see maxpou.fr/speaking)
- Open sources lover and contributor (see github.com/maxpou)

Experience

Senior Software Engineer

May 2018 - Present
VSware, Remote

Improving the frontend infrastructure of a massive Vue.js application (~5k vue&js files / ~650k lines of codes). Frontend part rely on a big monorepo

Working on the application architecture

Introduced and maintaining a testing culture (for unit and integration testing)

Working on application accessibility (A11Y) to meet AA criteria (WCAG)

Maintaining decent performances optimisation

Mentoring developers
